A message from the publisher:

Welcome to *Legion Outpost II*, an electronic fan magazine dedicated to DC Comics' ***Legion of Super-Heroes*** and ***Legionnaires***. The original *Legion Outpost* was a popular fanzine published many years ago; this project is an attempt to continue that legacy. *Legion Outpost II* will contain regular features such as Who's Who pages and chronological listings of all appearances of the Legion of Super-Heroes. The real goal, however, is to involve the reader in helping to create the bulk of this magazine through the submission of letters and articles. I'm counting on you to help me publish this 'zine on a regular schedule. Send me your ideas, your letters, corrections ... any information you have which will help me put this all together. Please E-Mail all correspondence to outpost2@InfiniteEarths.org. The reboot of the Legion of Super-Heroes will all but disregard the original history. With *Legion Outpost II*, not only will that history be preserved, but younger fans will discover the same Legion that I fell in love with 20 years ago. Long live the Legion!

This History of the DC Universe is a "post-Crisis"/"post-Zero Hour" history which concentrates heavily on reconciling errors created, in part, from ill-conceived retcons. Although the timeline given in *Zero Hour #0* established the debut of Superman and Batman at 10 years prior to the Crisis in Time, it was so filled with mistakes and was so overly-compressed that I have chosen a more comfortable 13 year period. Even though this makes both Clark Kent and Bruce Wayne 38 years old, I feel that, given their significance as the first heroes of the Silver Age, this is not unreasonable. Given the fact that it is not uncommon today for hard-working professionals to wait until their late 30's to marry, and given that it has been established that Lois Lane joined the Planet at a very young age and is thus probably a few years younger than Clark, these ages are quite believable. Remember, both Hal Jordan and Oliver Queen are known to be in their 40's. To be honest, I never understood DC's obsession with keeping Superman at 29 years of age! One of the purposes of Zero Hour was to reconcile the differences in the timelines set up in DC's various titles. It's hard to believe that, just prior to Zero Hour, Superman's debut was set a mere 8 years in the past!! That number totally contradicted just about every other series that DC published (*Batman, New Titans, Justice League*, et al). Actually, if I were true to the facts given in "Batman: Year Three", Batman's debut would be set 14 years prior to Zero Hour. I feel that 13 years is a reasonable period and I am basing this history on that number. In very few instances I needed to postulate about certain events. These conjectures are so noted.

Before beginning the DC history feature, I wanted to take a few moments to list some of the more glaring mistakes presented in the much vaunted timeline that was presented in *ZERO HOUR #0*. Some of the errors: (1) the Manhunters were not created 3 billion years ago ... that's when they rebelled, (2) Vandal Savage was not born 100,000 years ago ... it was 50,000, (3) Atlantis did not sink 50,000 years ago ... the number 45,000 appears in almost every Arion story, (4) J'Onn J'Onzz appeared in 1955 not "35 years ago" ... the whole reason he wasn't "attached" to the modern era of heroes in the first place was because of the 1950's Martians craze, (5) Captain Comet appeared in 1951 not "30 years ago" ... the fact that he appeared the same year that the JSA disbanded is significant, and the worst of all (6) Professor Zoom is not from 2456 and Booster Gold is not from 2458 ... where did these dates come from ?!? ... Professor Zoom began in 2460 (see *FLASH [second series] #79*) and Booster Gold began in 2462 (see just about every Booster Gold appearance!!). Well, you get the idea. Here's the real DC timeline ...

Oh, one more thing. As I noted above, this is a work in progress. In order to get this revision of issue #2 out in a timely manner, I rushed the details on the 20th century. I am well aware that some of the information might be slightly out of order. I assure you that all will be corrected over the next six months and that the final version will be accurate.

Arion sends out six expeditions. Arion establishes a new home. Another founds New Atlantis in Skartaris. Years after, time-traveling Rip Hunter, Jeff Smith, and Cave Carson visit Arion and learn of the arrival of [Vandal] Savage and the creation of the Brotherhood of Light (later the Illuminati) a few hundred years earlier. Soon after, Arion sends his 2-year-old granddaughter Kara to the 20th century. Garn Daanuth places himself in suspended animation.

c. 40,000 B.C. On an ancient world named Asgaard, located in the far reaches of space, the Old Gods fight their final battle. The Old Gods perish in a cataclysm which splits their world in two and cuts off that sector of space from the rest of the Universe. From the two molten spheres form two new worlds. The first, New Genesis, is a world of light imbued with the living atoms of the god Balduur. The second, Apokolips, is a world of darkness imbued with the essence of an evil sorceress. On those two worlds evolve the New Gods. Energy from this event travels instantaneously through space to all parts of the universe. In order to protect Atlantis from local savages, King Orin orders that a dome be built over Poseidonis. Later, a large meteor crashes near Atlantis and sinks the continent. A year later, the renegade Shalako takes followers through the tunnels to colonize Tritonis. He uses his magic to form a dome over that city. King Orin sends troops out to the surface world, none return (some reach Egypt). King Orin's scientists develop a serum which allows humans to breathe underwater. Aware that a demonic Lord Chaos will rule a future Earth in 2001 A.D., aware that Lord Chaos will later be defeated by the Titans, and believing that he could easily fill the power vaccuum, the Extant reaches back a few months in his new alternate timeline and alters events so that Donna Troy gives birth to a demonic Lord Chaos. The armor given to him by the Hawk-Monarch was so badly damaged it is scraped. Nathaniel Adam then recreates the Monarch armor (this is actually the origin of the Hawk-Monarch armor which he will later inherit!). Monarch builds a great fortress on the Moon to hide from his enemy and to plan for Lord Chaos' overthrow. Posing as Hank Hall (Hawk), Monarch forms the Team Titans to battle Lord Chaos. Monarch is unaware that, some years ago, the Time Trapper took a handful of children from the true reality and placed them in this alternate timeline to become sleeper agents in the Team Titans. The Team Titans are sent back in time to the true reality by Monarch supposedly to kill Donna Troy before she gives birth to Lord Chaos (in actuality, Monarch wants Lord Chaos to follow them, closing the time loop which leads to Lord Chaos' defeat). Section II - Legion chronology:

The following section is based on a Legion of Super-Heroes Chronology written by Myke 4 for the Mac and made available by him on *America Online*. Myke 4 wrote this history for fun. If you have any corrections, please E-Mail them to Myke 4 (with a cc: to Outpost 2). Since portions of his work duplicate the checklists already presented here, I have rearranged the columns so that the "Legion time" becomes the focus of the feature instead of the issue numbers.

The timeline chronicles all significant Legion events up until Zero Hour. This chronology lists events in the order that the Legionnaires experienced them. Any issue that chronicles an event in an order different from the publication order will be listed in parentheses. Certain events which have never been chronicled in print (the 5-year gap, Kid Quantum's admission and "death", etc.) are inserted chronologically among the regular issues. These events use bullets in place of issue numbers and cover dates. The history is constructed assuming that all timelines are valid ... events are listed regardless of whether they were retroactively eliminated or not. All 30th Century dates come from *2995: The Legion of Super-Heroes Sourcebook* and/or *LEGION OF SUPER-HEROES [fourth series]*.

Section III - Heroes of the 30th century:

Last issue provided rosters for not only the Legion but also the SW6 heroes, the Super-Pets, the Substitute Heroes, and the Legion Academy. Because of the complexity involved, the membership rosters for the four different Legion realities were listed separately. The rosters in this issue are much more simple and are thus listed as follows:

The pre-Crisis, post-Crisis, and Glorith realities are merged into a single listing, with the differences noted in parenthesis. This issue covers the miscellaneous 30th century heroes, and includes a roster of the Legion rejects.

The only roster associated with the reboot reality is that of the Workforce.

Section IV - The Adult Legion:

A number of tales chronicled the adventures of the Adult Legion of Super-Heroes and Adult Legion of Super-Villains. It was revealed in *LEGION OF SUPER-HEROES [second series] #300* that these characters existed in a reality different from the "true" Legion reality. It is not known how this alternate reality was affected by the Crisis on Infinite Earths, but it was undoubtedly destroyed during the Crisis in Time. The Adult Legion of Super-Heroes' appearances include: *ACTION COMICS #289, SUPERMAN [first series] #155* and *165, ADVENTURE COMICS #354-355, WORLD'S FINEST COMICS [first series] #168, WORLD'S FINEST COMICS [first series] #172* (imaginary story), *SUPERMAN [first series] #213*, and finally *LEGION OF SUPER-HEROES [second series] #300*. A teen-aged Legion Auxiliary was mentioned in the letter's page of *ADVENTURE COMICS #358* but never shown.

(Regarding the appearances of the Adult Legion of Super-Villains: According to *The Legion of Super-Heroes Index, volumes 1 through 5* by ICG, the adult LSV that menaced the "true" teen-aged Legionnaires were different from those who appeared in the dream reality of *LEGION OF SUPER-HEROES [third series] #300*. An analysis will be done in a future article, spotlighting the Adult Legion of Super-Villains, which will attempt to separate the appearances.)

The planet Bgztl exists in another dimension in the same relative position as that of Earth. It was colonized late in the 20th century by Bgztl and his people, with the aid of the heroine Phase. All natives of the planet Bgztl have the ability to become phantoms. Bgztl was one of the charter worlds of the United Planets. During the formal introduction of the Legion of Super-Heroes to the United Planets, a second assassination attempt was made on billionaire R. J. Brande. Tinya Wazzo, the daughter of the Ambassador from Bgztl, used her phantom abilities to help the Legion and the Carggite, Luornu Durgo, to save Brande's life. Much to her mother's displeasure, Tinya was offered membership in the Legion and accepted as Apparition. Months later, she would develop a romantic relationship with Ultra Boy, a member of the Workforce. During the White Triangle invasion of Earth, Apparition and Ultra Boy fought side-by-side. In what they perceived to be a lull in the action, they professed their love for one another. As they embraced, a Daxamite blasted them with his laser vision. Ultra Boy's invulnerability protected him ... Apparition was incinerated. Weeks later, the mourning Ultra Boy would make an incredible discovery. Apparition's soul had somehow survived within Ultra Boy's body! The combination of her phantom powers and his ultra-energy, and perhaps their love for each other, had miraculously anchored Apparition's soul to the physical world. Later, while stranded in the 20th century, Apparition married Ultra Boy. Soon after, Apparition learned that she had originally been born with the ability to triplicate, a trait she inherited from her Carggite father, but that she had been separated from her other selves at birth. Apparition encountered and permanently merged with one of her other selves, Phase of L.E.G.I.O.N., becoming solid once again. The fate of the third body is unknown.

code name: ***Triad***™
real name: **Luornu Durgo**
planet of birth: **30th century Cargg. Cargg was colonized in the late 20th century by Earth metahumans.**
powers: **Triplication of body (inherent in species).**
historical first appearance: **ACTION COMICS #276 (May 1961)**
modern first appearance: **LEGION OF SUPER-HEROES [fourth series] #0 (October 1994)**
historical data: **Joined the *Legion of Super-Heroes* as *Triplicate Girl*, a heroine who could split herself into three individuals. When one of her bodies was killed by *Computo*, she renamed herself *Duo Damsel*. Luornu married Chuck Taine (*Bouncing Boy*). Later, another of her bodies was apparently destroyed, but later turned up alive. In the "Glorith reality", Triplicate Girl also used the name *Triad*.**
modern data: **Luornu joined the *Legion of Super-Heroes* as *Triad*, the representative of Cargg.**

(Triplicate Girl, Duo Damsel)

The natives of the planet Cargg are all born with the ability to "triplicate". Although legend attributes the Carggite ability to triplicate to its triple-star system and the need to battle the world's great beasts, the ability developed out of the natives' latent meta-genes. Usually, all three bodies have identical personalities. On rare occasions, each of the three bodies will develop their own distinct personalities, like that of "normal" identical triplets, however the "unfortunate" Carggite who exhibits this phenomenon is considered a freak and is usually institutionalized. When one of these "freaks" re-combines, the distinct personalities merge. It is generally accepted that if one body is killed during separation, the others will also die. This may prove to be false in the case of a "freak". Cargg was one of the charter worlds of the United Planets. During the formal introduction of the Legion of Super-Heroes to the United Planets, a second assassination attempt was made on billionaire R. J. Brande. Luornu Durgo, an escaped Carggite "freak", now the personal aide to R. J. Brande, used her triplicating abilities to help the Legion and the Bgztl girl, Tinya Wazzo, to save Brande's life. Luornu was offered membership in the Legion and accepted.

Section VI - Legion checklist [historical] (part 2 - 1976 to 1982):

The following is part 2 of a chronological checklist of the historical version of the Legion of Super-Heroes. This list is not limited to just Legion appearances but also includes Legion cameos and appearances by such supporting characters as Mon-El, Elastic Lad, and Insect Queen. Also included are listings of reprints of Legion tales.

SUPERMAN [first series] # 295
cover date: January 1976
title: (*Superman* feature): "Costume, Costume - - Who's Got the Costume?"
comments: Xenofobe, a Green Lantern from the 30th century (Earth's space sector, 2814), travels to the 20th century in order to undo a change in the timestream. During a battle with the Green Lanterns, the Time Trapper used their green energy to wipe out all timelines except that of the Great Disaster ... causing the Legion of Super-Heroes and their reality to cease to exist! Xenofobe tricks Superman into battling someone who is apparently his 30th century descendant, Jaxon the Mighty. The Green Lantern uses the "super-energy" to restore the alternate timelines. Note: Cosmic Boy, Saturn Girl, Mon-El, Duo Damsel, Invisible Kid, and Element Lad appear in flashback. (Schwartz; Maggin; Swan/ Oksher).

SUPERBOY [first series] # 214
cover date: January 1976
title: story one (*Legion* feature): "No Price Too High"

title: story two (*Legion* feature): "Stay Small Or Die"

KARATE KID # 1

cover date: March-April 1976

title: "My World Begins In Yesterday"

comments: Karate Kid battles Nemesis Kid in the 20th century. Mon-El, Brainiac 5, Saturn Girl, and Lightning Lad come to his rescue in a time bubble. Nemesis Kid disappears. Karate Kid becomes angry because Nemesis Kid can only teleport if threatened by more than one opponent. He tells his fellow Legionnaires that he wants to fight his own battles and they leave. He attempts to fly away but soon discovers that his flight ring has been damaged in the fight. He makes it into an apartment window where he meets Iris Jacobs. He discards his flight ring. When he reaches the apartment roof, he discovers that Nemesis Kid has stolen his time bubble. He also finds that his enemy has left a chronal energy detector behind so that Karate Kid may track him. Karate Kid ultimately beats Nemesis Kid in battle. Karate Kid sends his unconscious foe into the future in his re-acquired time bubble. The Legionnaires find a note from Karate Kid stuck to Nemesis Kid's chest telling them that he is going to remain in the 20th century to find himself. Note: The letters page of *SUPERBOY [first series] #217* establishes that the *Karate Kid* series takes place in the Legion's future. Given that the story in *SUPERBOY & THE LEGION OF SUPER-HEROES #231* follows *KARATE KID #10*, and the last appearance in the Legion's magazine of Karate Kid as a full-time member prior to issue *#231* is *#224*, then one can conclude that the events in *KARATE KID #1* through *#10* must take place between issues *#224* and *#231*. Since it is stated in *KARATE KID #1* that Mon-El is the current Legion leader, and since Mon-El was replaced by Wildfire as Legion leader in the first story in *SUPERBOY [first series] #225*, then the only possible gap to place *KARATE KID #1* into is between issues *#224* and *#225*. This conclusion is verified by Wildfire's statement in the first story in issue *#225* that Karate Kid is on leave in the past. (Orlando; Levitz; Estrada/ Staton)

In their eleventh year there (Earth time), the planet began to shrink! As the world slowly shrank, the colonists began to starve. After 50 days of this, one of their scientists developed a shrinking ray from radiation found in the planet's unique rock. Imskians require yearly doses of this radiation in order to retain their powers. The planetary shrinking occurs once every 10 Earth years and lasts for 90 Earth days. Unfortunately for the Imskians, space dragons ate all of the radioactive rock, so they must constantly harvest the radiation from the creature's scales. An attempt by the Legionnaires to aid in this effort causes an explosion which merges Colossal Boy, Lightning Lad, Saturn Girl, and Shrinking Violet into one, mad monster! The mercenary Bounty in hired to stop the monster. Bounty is arrested for using nukes, outlawed centuries earlier on Earth, against the monster. Kantuu, one of their leaders, organized a raid on the planet Oa, home of the Guardians of the Universe. The Guardians capture the Djinn. They imprison the Djinn in bottles of green energy, then shrink them to a fraction of their original size. In order to teach the Djinn humility, the Guardians curse them and tell them that they will remain imprisoned until some innocent soul releases them. They would then be obligated to perform three services for their host. The Guardians then disperse the bottles across the galaxy. A score of bottles, including Kantuu's, land on Earth. Kantuu's bottle lands in Arabia, where he is freed briefly by Lord Saladin. Saladin uses his third wish to re-imprison Kantuu and expel him from the Earth. Kantuu has returned to Earth to free his fellow Djinn. Bouncing Boy realizes that the reason Kantuu didn't obey him earlier was because he couldn't ... the bottle was destroyed. He and Duo Damsel order Kantuu to reconstruct the bottle and then enter it, trapping himself once again. (Harris; Conway; Janes/ Hunt)

The Legionnaires battle Vibrex, but are beaten when he uses his powers to disable their flight belts. The Legionnaires return soon after and defeat Vibrex using their newly invented flight rings. Brainiac 5 was able to create the rings from Element 152. He had been studying the substance and discovered that it could be controlled mentally. Vibrex's powers were no match for the new technology. cover date: December 1981
title: "If Answers There Be ..."
comments: Part six of six. In the 20th century, the Legionnaires are in prison. The Time Trapper is revealed to be behind the Molecule Master. On Bgztl, an Earth-like world, Phantom Girl explains that her phantom powers derive from partially phasing back to her home dimension. They are currently in a period before the residents discovered their phantom powers. Phantom Girl attempts to transport them back to the Earth dimension but, along the way, Dawnstar senses Jo Nah ... 1000 years before his "death"! They find his body floating in the region between dimensions in some kind of stasis field. Back on Earth, Lana Lang becomes Insect Queen. From within the field, Jo Nah explains that the explosion resulting from Captain Frake's weapon turned him into a phantom who was moving backwards in time! He hurried that movement towards Superboy's era for help. When Jo tried to contact Superboy through his telepathic earplug, his mind overwrote Superboy's. He knew he needed to get free, so he went to the atomic bomb site and caused the explosion in hopes it would help. Instead, it only worsened the mindlink. His mind was now becoming confused. He decided his best bet was to head for the 30th century. When he attempted to do so, the post-hypnotic suggestion that Saturn Girl had planted in Superboy's mind, preventing him from returning to the 30th century, kicked in. The pain was unbearable! Total amnesia followed. All he knew was that he had to go to the Legion ... but he didn't know if they were friends or foes. He created the Reflecto disguise. Superboy frees Jo and their minds return to normal. The three then continue to Earth, and with Insect Queen's help, free the Legionnaires. The Legionnaires then head to the future to stop the Time Trapper. The Trapper tries to blast the heroes into oblivion, but Phantom Girl turns the cannon on him and vaporizes him. Superboy has Saturn Girl remove the post-hypnotic suggestion and erase all memories of the Psycho-Warrior incident. Superboy rejoins the Legion and goes home to clear his name. A statue is erected in Reflecto's memory. Note: Later, it is revealed that a real Reflecto did exist. He was a hero on Rimbor, thus explaining Jo Nah's choice of that identity. (Barr; Thomas/ Levitz; Janes/ Patterson)

THE LEGION OF SUPER-HEROES [second series] # 283
cover date: January 1982
title: "The Startling Secret of Wildfire!"
comments: Applicants Lamprey, Nightwind, and Crystal Kid try once again for Legion membership but are rejected. Wildfire tells them his origin story. Drake Burroughs was a student at Metropolis Multiversity. He quickly became bored with his studies. He was only there because his parents died in government service and he received a scholarship. He was planning on leaving after the end of the semester. While talking with Professor Vultan, Drake meets the professor's daughter, Zera. Later, Drake takes out his girlfriend Kerri. A few weeks later, as part of his lab work, Drake helped out with some routine chores on the propulsion system project. He started clowning around and a safety valve snapped. The rocket discharged a lethal blast of anti-matter energy which engulfed Drake. Somehow he was still alive, transformed into anti-matter! His form was contained within a closed test tube. Professor Vultan decided to place him in the ERG-Suit he had been developing. The Multiversity issued a statement declaring that Drake had died in the accident. The Professor succeeded in stabilizing Drake in the suit and training began. Drake discovered that the suit possessed all kinds of powers. After some basic training, Drake left Professor Vultan and Zera. Drake went to see Kerri but, before he could speak to her, she ran away in fear. Kerri flew off in her speeder and got into a serious accident. She ended up in a coma. Later, Drake applied to the Legion as ERG-1 but was rejected. Soon after, he appeared to die on Manna-5 aiding the Legionnaires. Later, he returned to his suit ... just in time to save the Legion from the Molecule Master. Drake was admitted to the Legion as Wildfire. Immediately following his induction, Drake decided to check in on the Vultans. He learned that the Professor had died! Zera told Drake she wanted to run some tests on him. Zera began to drain Drake's energy from the suit in an attempt to kill him! She explained that the Professor had built the suit for himself to protect himself from his wasting disease, but he gave it up for Drake. Drake convinced Zera that her father would not approve of her desire for revenge and she let him go. Soon after that, Drake located the recovered Kerri. It had been a year since his accident. He learned that she was in love again and happy. Drake allowed her to continue to think he was dead. (Barr; Thomas; Bender/ Patterson)

Section VII - Letters page:

Welcome to the second issue of *Legion Outpost II*. This fanzine is FREE on the Internet and will be made available through the mail a few months. By issue *#6* I will have exhausted the majority of my research so send me anything and everything you've got! This won't work without you!

I'd like to take this opportunity to thank the following America Online members for all their help: Myke 4, JoanDW, Mon-El2995, J Scrooge, and Jephers.

On to other business:

J Scrooge suggests a Legion crossword puzzle. *(I've been working on one ... it's a lot more difficult than you think).*

Reep asked me if an official sequence of the pre-ADVENTURE COMICS #300 adventures was ever established. He has seen a number of different theories himself. In this issue, I took Myke 4's checklist/ timeline and modified it to reflect events as the Legionnaires experienced them. In a future issue I'll explain just how I came to the conclusions that I did. Suffice it to say, I don't see how the adventures could have happened in any other sequence.

And now ... the event you have all been waiting for ... the results of the Legion Survey!!

Lightning Lad. NiteWatch is writing a feature on death in the Legion. Myke 4 wrote a Legion biography. Jephers is working on Encyclopedia Galactica. I'm planning a three-dimensional map of U.P. space. Also, a roster for the Legion of Super-Villains and articles on Crisis, Zero Hour, and Kamandi (you'll see). Plus, Who's Who featuring Leviathan and Kid Quantum. Finally, the checklist continues. Keep the creative juices flowing folks!

A note to the readers regarding the checklist: (1) Again, I noticed that my checklist sources more often than not left out punctuation (missing exclamation marks, use of triple periods and dashes). (2) I was uncertain of the publishing order of a handful of issues however I do believe that everything after mid-1984 is in the correct sequence. (3) Again, in some of my sources, bi-monthly comics are handled incorrectly. For instance, a bi-monthly comic with a September cover date actually goes on sale with the August issues. I am attempting to identify those issues and have already corrected a number of them. (4) I did my best to chronicle even the most obscure cameos. Any and all corrections would be appreciated by not only me but all the readers as well. As I stated last issue, I believe this to be the most complete Legion checklist EVER! Help me make it perfect.

That's it for now! Please E-Mail all comments and ideas to me at outpost2@InfiniteEarths.org. See you next issue.
